LUKAS JANUŠAUSKAS

Student with a passion for data science

▶ ABOUT ME

I'm a data science student with a passion for machine learning and data analysis. I bring to the table experience, strong communication skills and a great work ethic work ethic coupled with passion for data science.

▶ ACCOMPLISHMENTS

- Opportunity to work in an anomaly detection research project.
- 1000€ *"Coherent Solutions"* scholarship for being the student with the highest GPA in the first semester.

▶ EDUCATION

VILNIUS UNIVERSITETY
2023 - *present* (2027)
Data Science undergraduate

▶ WORK EXPERIENCE

STUDENT RESEARCHER | VU
2025-03 *to* 2025-06

As a student resercher I worked on a maritime anomaly detection model with a Vilnius University researcher. Not only did it require extensive **machine learning** knowledge, but strong **analytical skills and attention to detail**.

MATH TUTOR | COREPETITUS
2023-10 *to* 2025-06

In my time as a math tutor, primarily for 11th and 10th grade students, I developed strong **communication skills**. I am now quite capable at explaining complex ideas in simple terms.

▶ SKILLS

SQL - strong skills in creating queries for messy real world data.

Communication skills - I am quite capable at explaining complex concepts in simple terms.

Python - ability to work with data science libraries and write good quality code, using best practices.

Machine Learning - I have strong foundations and experience developing ML and AI models. I understand the full model lifecycle, ensuring models are not only accurate but also practical and business-relevant.

R - ability to utilize this language to engineer and analyze data and to apply statistical methods.
